TO: ALL CRIMINAL JUSTICE ADMINISTRATORS
STATE OF IDAHO

Submitted herewith is Idaho's Annual Uniform Crime Report (UCR), as compiled by the Technical Services Unit, Police Services Division, of the Idaho Department of Law Enforcement.

This report portrays the nature, volume and extent of crime in Idaho and has been made possible through the concerted efforts of the many law enforcement agencies who consistently submitted the essential data. These data, in turn, have been provided to the Federal Bureau of Investigation for tabulation of national crime statistics and inclusion in their annual publication, Crime in the United States.

This report will assist law enforcement in management decisions and will provide valuable information for use by both private and public organizations and institutions. It is also hoped that it will enhance awareness among the general public that crime exists as a serious problem within our communities and requires attention from every segment of society. Criminal activity cannot be eliminated by law enforcement agencies acting alone; effective crime control requires active citizen participation.

Sincerely,

John Rooney

UNIFORM CRIME REPORTING

For over fifty years, law enforcement agencies' data have been collected at the national level under the auspices of the Uniform Crime Reporting (UCR) Program. These city, county, and state statistics voluntarily provided to the UCR program have supplied information on offenses known and have gauged and measured fluctuations in crime. During its first year (1930), the Program enlisted the cooperation of 400 cities in 43 states, representing approximately 20 million inhabitants. Participants currently number in excess of 15,000 and represent a population of nearly 230 million. Throughout its years of operation, the Program's foremost objective has remained the same -- to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management.

Just as many technical advances have enhanced the Program, the use of UCR data has also expanded. UCR statistics have become a valuable research source for a wide range of constituents, including legislators, criminal justice practitioners, planners, scholars, and the press. The general public has also become increasingly interested in these periodic assessments of criminal activity throughout the nation.

Because criminal codes vary from state to state, it is not possible to aggregate state statistics directly to obtain a national data set. Therefore, in 1927, the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was formed to create a system of uniform police statistics. Standard definitions were established and, because of wide variances in punishment for the same offenses in state codes, it was decided not to attempt to distinguish between felony and misdemeanor crimes.

In an effort to provide as complete a picture of crime as possible, the Committee elected to obtain data on offenses that come to the attention of law enforcement agencies, since these data were more readily available than any other reportable crime information. While all crimes are serious to a varying extent, seven offenses (known as the Crime Index) were initally selected to evaluate fluctuations in the volume of crime. These crimes -- murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft -- were chosen because of their seriousness as well as their frequency of occurence and likelihood of being reported to law enforcement. By congressional mandate, arson was added as the eighth Index offense many years later.

Implementation of the UCR Program was successfully undertaken in 1930. In that same year, Congress enacted legislation under Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information. He, in turn, designated the FBI to serve as the national clearinghouse for data collected by the Program. Since that time, the FBI has served in this capacity.

UNIFORM CRIME REPORTING IN IDAHO

The Idaho legislature has authorized the Department of Law Enforcement to collect and record criminal statistics on a statewide basis. The Criminal Identification Bureau began developing the present program in the early months of 1973. Idaho Code, Section 19-4812, requires the submission of crime statistics from all sheriff's offices and police departments of municipalities of one thousand or over population. Municipalities with under one thousand population are encouraged to supply reports to the county sheriff's office for inclusion in that department's reports.

General criticism of crime statistics holds that such compilations do not give a true picture of criminal activity. Many crimes are not reported for various reasons. In some criminal activity, the victim is actually one of the participants (gambling, liquor and drug violations, prostitution) and no offense is ever reported. Other crimes go undetected and therefore unreported; for example, the store owner who does not realize an item has been shoplifted cannot report the offense.

On the other hand, an increase in reported crime does not necessarily mean an actual increase in criminal activity since the reporting procedures of an agency may have improved or been changed. As police become more professional and efficient, more crimes may be reported to them. Crime Prevention programs in a city or neighborhood may account for more burglaries or other offenses being reported. In addition, while an area may show no Index Crimes, other types of crime, such as forgery, fraud, or embezzlement, for which only arrests are reported, may have accounted for the loss of thousands of dollars by the victims of these crimes.

In answer to these criticisms, it must be understood that the statistics contained in this report were never meant to hold forth as absolute fact, but as an estimate of criminal activity. These data have been collected and tabulated with great care and those who use this information may rest assured that every effort has been made to present the most accurate picture possible of "CRIME IN IDAHO."

CRIME FACTORS

Statistics gathered by the Idaho UCR Program are police statistics. Agencies report offenses and arrest data according to the Uniform Crime Classification, however, and not according to state statute or city ordinance definition. The disposition data is police agency data, rather than court or county prosecuting attorney data.

In addition, reported Index Crimes, or PART 1 Offenses, and arrests are related to the jurisdiction in which they occur, rather than to the agency which may investigate, make arrests, or otherwise dispose of the case. The clearance is thus reported by the jurisdiction in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense.

Factors which influence crime rates are dependent upon the characteristics of the community. When attempting to interpret crime statistics, the reader is cautioned to consider these characteristics along with other factors that lead to or cause criminal behavior. Awareness of the various factors which may influence the resulting volume and type of statistics presented is necessary if accurate and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of statistics between communities should not be made without first considering individual characteristics present in each community.

Police are limited to the suppression and detection of crime. The fact that police deal daily with crime does not mean that they have unlimited power to prevent it, reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in the nation. They do not enact the laws they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the government, and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is limited to case by case operations, one criminal or one crime at a time.

Set forth below are some of the conditions which will, by type and volume, influence criminal activity from community to community:

Density and size of the community population and the metropolitan area of which it may be a part;

Composition of the population with reference particularly to age, sex, and race;

Economic status of the population;

Relative stability of population, including commuters, seasonal, and other transient types;

Climate, including seasonal weather conditions;
Educational and recreational characteristics;
Standards governing appointments to the police force;
Policies of the prosecuting officials and the courts;
Attitude of the public toward law enforcement problems; and
The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

CRIME IN IDAHO

Versus

CRIME IN THE UNITED STATES

1982

Crime in the United States for the year 1982, as measured by the Crime Index Offenses, dropped four percent, while crime in Idaho decreased by ten percent when compared with calendar year 1981.

On the National level, violent crimes fell three percent, and on the State level these crimes decreased nine percent. On the National level, murder decreased seven percent, forcible rape decreased five percent, robbery decreased seven percent, and aggravated assault increased one percent. Twenty three murders were reported in Idaho, and when compared to the 43 reported in 1981, show a 47 percent decrease. Forcible rape decreased 21 percent, robbery decreased 20 percent, and aggravated assault decreased five percent.

On the National level, property crimes of burglary, larceny - theft, motor vehicle theft, and arson decreased four percent. Idaho experienced a 10 percent decrease in these categories. On the National level, burglary decreased ten percent, larceny-theft decreased one percent, motor vehicle theft decreased three percent, and arson decreased 12 percent. On the State level, burglary decreased 13 percent, larceny - theft decreased nine percent, motor vehicle theft decreased 19 percent, and arson decreased seven percent.

Regionally, the total Crime Index volume fell seven percent in the Northeastern States, six percent in the North Central States, two percent in the Western States, and one percent in the Southern States. The Nation's rural and suburban areas each registered annual decreases of six percent, while cities with populations over 50,000 recorded a three percent decline.

ARRESTS

IDAHO ARREST DATA

The Uniform Crime Reporting Program requests the reporting agencies to report the number of arrests made for offenses which occurred in their jurisdiction, on a monthly basis. The arresting agency does not report the arrest if it was made for another jurisdiction.

A person is scored only once for each time arrested. This means if a person is arrested and is wanted for several crimes, he would be scored only once, for the most serious crime. Several persons may be arrested in connection with one crime and each person is counted as an arrest.

Arrest data is NOT an accurate measure of the number of different persons arrested because one person may be arrested several times during the year.

VOLUME and RATE

Law enforcement agencies in Idaho reported 39,903 arrests for all criminal activity, excluding traffic, in 1982. There were 4,135 arrests per 100,000 persons in the State.

Arrests for Part I crimes accounted for 25 percent of the total arrests. Of these Part I arrests, 14 percent were for violent crimes and 86 percent were for non-violent crimes.

ARRESTS BY AGE

The arrest of persons under 18 years of age accounted for 29 percent of the total arrests made in 1982. Juveniles accounted for 48 percent of the arrests for Part I Offenses, as compared to 52 percent involvement of persons over 18. Juveniles accounted for 20 percent of the total arrests for violent offenses and 52 percent for non-violent Index Offenses. Fifty-six percent of all arrests for motor vehicle theft, 52 percent of arrests for larceny, and 51 percent of all arrests for burglary were juveniles.

The arrest of persons under 15 accounted for 36 percent of the total juvenile arrests and arrest of persons 15 to 17 accounted for 64 percent of the total juvenile arrests.

Of arrests made for violation of narcotic drug laws, 26 percent were under the age of 18.

ARRESTS BY RACE and ETHNIC ORIGIN

In 1982, 96.3 percent of all persons arrested were White; 0.7 percent were Black; 2.8 percent were American Indian or Alaskan Native; 0.2 percent were Asian or Pacific Islander; 9.1 percent were of Hispanic origin; 90.9 percent were not Hispanic.

LAW ENFORCEMENT OFFICERS

The killing or assault of law enforcement officers is an increasingly serious problem faced by law enforcement administrators nationwide, and it should be of the gravest concern to the public at large. Such acts directly affect the functioning of proper law enforcement operation and thus reduce the ability of our law enforcement agencies to combat crime and maintain law and order. Today, the ambitious young man who considers a career in law enforcement must also consider the risk of being killed or assaulted by a member of the society that he is sworn to protect.

In 1982, there were 285 assaults on law enforcement officers in Idaho, as compared to 289 in 1981, which is a 1.4 percent decrease. While every assault did not result in personal injury to the officer involved, many of them did result in physical harm to the officer, with loss of work time.

During 1982, 25.3 percent of all assaults resulted in injury to the officer, as compared to 21.1 percent in 1981. These 285 officers assaulted amounted to 17.0 percent of all sworn county and city law enforcement officers.

LAW ENFORCEMENT EMPLOYEE DATA

LAW ENFORCEMENT DATA

The Uniform Crime Reporting Section collects annual data on law enforcement employees. From 1981 to 1982, there was an estimated 8.2 percent increase in the number of full-time employees within the various Sheriffs' offices and a 0.2 percent decrease in the Police departments located throughout the State.

In 1982, the average number of full-time law enforcement employees (Police and Sheriffs' departments), including civilian personnel, amounted to 2.0 employees for each 1,000 inhabitants in 1981. The rate, based on sworn personnel only, amounted to 1.8 per 1,000 population in 1982 and 1.7 in 1981.

COUNTY SHERIFFS' DEPARTMENTS

As of October 31, 1982, there were 981 persons employed full-time in Idaho's Sheriffs' departments, of which 913 were sworn personnel and 68 were civilian employees.

POLICE DEPARTMENTS

There were 56 municipal Police departments who reported 987 full-time employees, as of October 31, 1982, which consisted of 826 sworn personnel and 161 civilian employees.

IDAHO STATE POLICE

The Idaho State Police reported 170 full-time employees in 1982, which is a 33.9 percent decrease from 1981. Of the 170 full-time employees, 32 are civilian personnel. The decrease is due to the transferal of the weigh station division to the Department of Transportation.
